Learn More

The Problem

AI companies face an impossible compliance landscape — and there's no infrastructure to manage it.

€35M+

Maximum fines under
EU AI Act per violation

700+

AI-related bills introduced
across 45 US states

0

Affordable compliance platforms
built for the Indian market

The Market

A massive, fast-growing market with near-zero incumbent solutions for the mid-market.

Our Solution

The compliance layer every AI company plugs into. One platform for risk classification, monitoring, auditing, and reporting.

Adhi Compliance

AI-powered compliance management that understands regulations like a legal team, monitors like a security system, and reports like an auditor — at a fraction of the cost.

How It Works

1

Register

Register your AI systems with metadata — purpose, model type, deployment region, affected populations

→

2

Auto-Classify & Monitor

AI automatically classifies risk level, maps regulations, and begins continuous compliance monitoring

→

3

Stay Compliant

Get alerts on regulatory changes, run audits, generate reports, and manage incidents — all from one dashboard

Key Features

Product Dashboard

Adhi

- Dashboard
- AI Systems
- Regulations
- Compliance Chat
- Bias Auditor
